Lectures in Forensic Veterinary Medicine, Veterinary laws and regulations, and Ethics and communication in veterinary medicine (curriculum 2009 and 2014) are held in the lecture hall of the Department of Pathological Morphology. Students attend the third part of the course package they selected in the 9th semester and complete a block of practical training in the field of their elective package lasting 20 working days.

Detailed information on the schedule of lectures and exercises can be found on the Faculty's website and on the notice boards of the departments. Teaching in elective fields will be organized according to the schedule specific to each elective area. Exercises are held on a biweekly schedule, and the timetable for exercises in elective areas will be determined in agreement with the professors responsible for each field.

Elective courses for the eleventh semester belong to the elective field chosen upon enrollment in the ninth semester. Groups for practical exercises in elective areas are formed for each field within the following Departments:

- * Clinical pathology and therapy of social animals,
- * Breeding, pathology and therapy of farm animals,
- * Preventive veterinary Medicine,
- * Food hygiene and technology of animal origin.

Rotational practice (curriculum 2021) will be conducted according to schedules determined by the departments where the teaching takes place.
